

5050 Shoe deodorant

Product description

The contained microorganisms in the microbiological odour remover consume odour harmful substances and act directly at the source of unpleasant odours. The product is very material compatible due to its aqueous-alcoholic composition.

Advantages

- Eliminates unpleasant odors
- Natural active principle
- Regular use for long-lasting freshness
- Pleasant citrus scent

Application fields

All types of shoes, e.g. work shoes and carpets or upholstery

Application

1. Shake well before use.
2. Spray wet onto surfaces
3. Repeat, if necessary.

Note: The bacteria take up to 2 days in order to multiply and consume smells accordingly. A warm and humid climate positively influences the action.

Technical Data

Property	Value
Chemical Base	Solution of bacteria spores
pH-value (25°C)	ca. 7 (neutral)
Biocide-guideline	Not applicable
Biological degradation	Readily biodegradable
Dermatological tests	Very good
Further tests	Non-toxic, non-sensitizing. The bacteria are not pathogenic.
Guideline § 9 EG Exposure to biological agents	In accordance
Storage stability	12 months
Recommended storage	5°C - 30°C

Find comprehensive advice on health, safety, and environmental protection in the corresponding safety data sheets.

Available Containers

Container	Volume
Spray can	125 ml
